

LISA MOUNTING-Protect

In the past years, damages due to art theft have been increasing considerably. Yet, an effective securing of paintings, graphic arts, and pictures is oftentimes rejected for financial reasons. Especially the securing of temporary exhibitions at reasonable costs is highly problematic since current technology for the securing of paintings on the market does not allow cost-effective protection.

www.do-not-touch.de

Now also available for rent!

LISA MOUNTING-Protect for securing paintings fills this gap. Only a few manual handles are required to affix this extremely compact, only 5mm high alarm circuit board to the painting's rear or to the exhibition wall. If requested, the electronics can also be installed with an additional safety cover. A transmitter module is fixed at the opposing side.

Easy installation

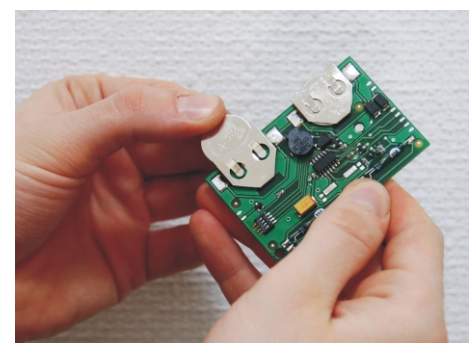

Step 1: Installation of **MOUNTING-Protect** on rear of the painting

Step 2: Hanging of the painting in order to measure the proper position of the alarm transmitter

Step 3: Marking of the alarm transmitter on the wall and subsequent installation on the wall

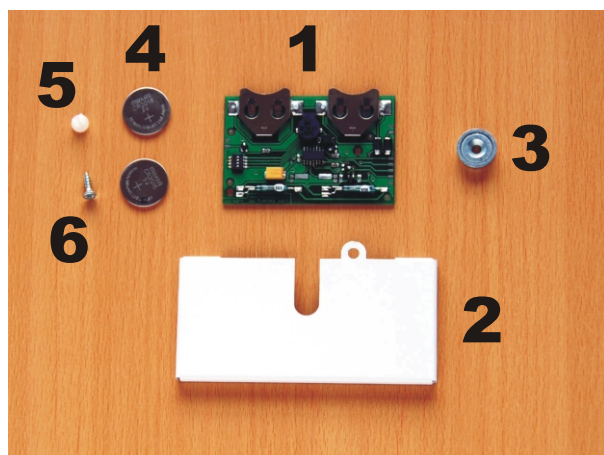

Step 4: Inserting of batteries in the alarm transmitter and done!

LISA MOUNTING-Protect

Upon removing the painting from the wall a clearly audible alarm tone informing security staff is triggered. The alarm signal's type and duration are adjusted through micro switches located on the alarm circuit board. **LISA MOUNTING-Protect** is operated with flat lithium batteries. The changing of batteries is not required during normal operation. The system is securely protected from any kind of manipulation through an integrated sabotage control circuit.

Scope of Delivery

- 1 Alarm module
- 2 Cover featuring adherend
- 3 Alarm transmitter
- 4 2 x Batteries
- 5 Securing clip for alarm module
- 6 Retaining screw for alarm Transmitter

LISA MOUNTING-Protect is inexpensive, quickly installed, reliable, easy to handle and generates no additional costs. **LISA MOUNTING-Protect** is the apt product for the securing of paintings, graphic arts, and pictures in museums, galleries and art collections.

Technical Data

Article:	LISA MOUNTING-Protect
Function:	Intelligent sensor for securing works of art
Alarm types:	Permanent tone optional, 5, 20, 45 seconds Siren tone optional, 5, 20, 45 seconds
Volume alarm signal:	94 dB in 10 cm distance
Other:	External relay switch output for alarm transmission (OC)
Voltage supply:	2 lithium batteries CR2016 3,0 Volt
Operational readiness:	Unlimited (no alarm triggering)
Total sizes:	Alarm circuit board 70x48x5 LxWxH in mm, weight 15 gr. Transmitter module 16 mm, height 5 mm, weight 6 gr.
Warranty:	36 months
Scope of delivery:	Alarm circuit board, alarm transmitter, cover, 2 batteries, securing clip, retaining screw, installation and operational manual
